Storytelling for Business

Storytelling for Business

Storytelling is one of the most powerful tools leaders can use to communicate effectively, build trust and influence people. In business settings, stories create shared understanding, connect teams with organisational purpose and help communicate strategy in a way that inspires action.

This programme is designed to equip learners with the confidence and skills to present ideas with clarity, structure and impact. By blending professional presentation techniques with the art of storytelling, learners discover how to connect authentically, influence others and leave a lasting impression. It is structured in two stages:

Stage One - focuses on content training and design

Stage Two - centres on skills practice and feedback

Through this blended approach, learners will develop the confidence to engage people, create common ground and communicate with credibility.

This programme is fully customised to support strategic organisational priorities while addressing individual learning goals. Early engagement during the design phase is strongly recommended.
