Introduction to Process Design

(Process Mapping)

Q0011

Introduction to Process Design (Process Mapping)

This course provides fundamental skills for process design and standardisation, inherent in the application of the "process approach" to ISO management system standards such as ISO 9001, 14001, 45001, 50001, ISO 55001 and many others. Delegates should develop the capability to understand customer and stakeholder requirements and define standardised processes to deliver them.

The process approach used in this training programme enhances an organisation's effectiveness and efficiency in achieving its defined objectives. With reference to ISO 9001:2015 this means enhancing customer satisfaction by meeting customer requirements.

Requirement of Process Approach for all Annex SL-based Management System Standards.

Duration & Price

Duration: 2 days
Public Virtual Training: £435 + £30 fees
Delivery mode: This programme is available In-Company, and via Public Virtual Training

Dates & Locations

Date	Venue	
17 - 18 Sep 2024	Virtual	Book Date

In-Company Training

Please contact us for more information on our In-Company training options

Who should participate?

- Quality managers & engineers
- Business improvement managers
- Internal and supplier/vendor auditors
- Those who manage quality management systems

What will I learn?

Participants achieve the following learning outcomes from the programme;

- define a process that reflects the flow down of customer and stakeholder requirements.
- define the requirements of the customer/stakeholder for a specific process.
- develop process standardisation in support of the establishment of good process management practice.
- identify where key measures are located in a process.
- ensure that processes are well defined and standardised such that they reflect management intent and enable effective audit of performance and risks.
- extend process definition through the supply chain.
- establish a foundational understanding of current performance/practice.
- sustain improvements through effective standardisation.
- define a process and standardise it with respect to an understanding of what aspects are key to the specific requirements of customers and stakeholders including compliance requirements.
- be a quality coach for process thinking and standardisation.

How will I be assessed?

Continuous assessment though individual and group exercises

Programme accreditation

This course is presented by Antaris (01185832)
