REACH and CLP – the Basics

HS011

## REACH and CLP – the Basics

This one-day training course is suitable for business and regulatory managers and specialists working in companies that make, import or use chemicals (essentially every manufacturing or construction business within or supplying to the UK and EU27) who need to define their obligations under REACH and the CLP regulation.

This workshop is an excellent place to start for anyone who needs to understand more about their compliance obligations under these regulations.

The comprehensive programme introduces the key elements of UK and EU REACH and GB and EU CLP and covers the implications for manufacturers, importers and users of chemicals throughout the supply chain.

The REACH (Registration, Evaluation, Authorisation and restriction of Chemicals) Regulation has fundamentally changed the shape of every supply chain within the UK and EU27. REACH affects all chemical substances that you manufacture, import or use to make your products and to run your processes.

If you need to know more about REACH then the chances are that you will also be affected by the Regulation on Classification, Labelling and Packaging of substances and mixtures (CLP). Therefore, this course also provides attendees with an overview of what this could mean for your business.

The requirements pertaining to UK and EU 27 Safety Data Sheets will also be covered.

## Duration & Price

Duration: 1 day

Delivery mode: This programme is available In-Company

## Dates & Locations

*In-Company training programmes are customised for your organisations specific needs. Most In-Company training is now delivered virtually.*

## In-Company Training

## What's covered?

- Introduction to the REACH regulation  
Aims of REACH, the legal text, key stages.
- What's covered by REACH?  
Scope of the regulation, exemptions, and exceptions, what needs to be registered.
- Overview of the Registration process  
Who needs to register, what's in a registration dossier?  
Lead and member registrants, basic data requirements.
- The Candidate List and SVHCs  
The authorisation process, "problem" substances.
- Introduction to CLP regulation  
The link to GHS, key requirements of CLP.
- CLP notification  
Notifying, classification and labelling of substances to ECHA, online submission in REACH-IT.
- Safety Data Sheets  
Supply obligations, updates to REACH Annex II.
- Format and content of the SDS  
Layout of the SDS, the extended SDS, headings and subheadings.

## Who should participate?

- Engineering and technical personnel
- Laboratory personnel
- Procurement and purchasing personnel

## What will I learn?

Participants achieve the following learning outcomes from the programme;

- Understand the importance of REACH and CLP in the context of substance identification and naming
- Be able to compile safety data sheets
- Understand the labelling requirements of REACH/CLP
- Understand the implications of REACH/CLP to producers, importers and down-stream users.
